CCDM 99-DOE-01810

Rev 2

Mr. Steve Gunderson  
Rocky Flats Cleanup Agreement Project Coordinator  
Hazardous Materials and Waste Management Division  
Colorado Department of Public Health and Environment  
4300 Cherry Creek Drive South  
Denver, Colorado 80222-1530

Dear Mr. Gunderson:

The purpose of this letter is to transmit the enclosed March 29, 1999, Building 779 Cluster Closeout Radiation Survey Plan (Plan). Consistent with the Rocky Flats Cleanup Agreement consultative process, the draft March 9, 1999, Plan has been revised to incorporate quality assurance and other comments provided by your staff. In addition, the enclosed document incorporates additional comments from MACTEC-ERS, the Rocky Flats Field Office Independent Verification (IV) contractor.

Please note that the demolition of Building 729 is currently scheduled for April 21, 1999. Given the extensive use of the consultative process in the preparation and review of this Plan, we ask for its rapid review and approval. Further, per the requirements in the enclosed Plan, as part of the Building 779 Cluster Closure Project, Building 729 is scheduled to complete a final closeout radiation survey by March 31, 1999. After a Department of Energy (DOE) review, the survey results will be transmitted to you.

Finally, the IV team contracted by the DOE has completed its sample work and will provide verification results as soon as possible. These results will be transmitted to CDPHE as soon as possible after receipt and review by the DOE.

If you have any questions regarding the Plan, please contact me on 303-966-5918, David Nickless on 303-966-5221, or Dorothy Newell on 303-966-3521.

Sincerely,

Joseph A. Legare  
Assistant Manager for Environment and Infrastructure
